

European CanCer Organisation

**A mission to connect the cancer
community**

ECCO: the united voice of European cancer professionals

24 member societies representing over 150.000 HCPs

ECCO: representing the cancer patient

17 patient associations gathered in its Patient Advisory Committee

A mission of connection

**“To improve outcomes
for all cancer patients
in Europe through
multidisciplinarity”**

How do we connect the cancer community?

*By driving unifying
Oncopolicy activity,
currently focused around 4
priority areas:*

Ongoing current actions (2018)

How do we connect the cancer community?

*By driving unifying
Oncopolicy activity,
currently focused around 4
priority areas:*

Ongoing current actions (2018)

Quality Cancer Care

- Essential Requirements for Quality Cancer Care (ERQCCs)
- Quality Cancer Care Week & other communication initiatives
- Quality Cancer Care Measurement (see 2018 Summit resolutions)

Access to Innovation

- Access to Innovation Position Paper (providing a wide mandate)
- Understanding value across the cancer care continuum
- Exploring opportunities for better measurement of outcomes
- Engaging in the debate on efficiency in cancer care

Integration of Cancer Care

- “Essential Requirements” for primary care roles in cancer care
- 2018 Summit resolutions to make integrated cancer care a reality

Oncology Workforce

- Promoting multidisciplinary at every political opportunity
- Supporting specialisation (e.g. oncology nurses and pharmacists)
- Workforce safety, workforce shortages, inter-disciplinary training

How do we connect the cancer community?

By bringing the community together once a year for a precise policy-driven Summit at which:

- **Resolutions for achieving improvement can be agreed** (e.g. quality cancer care measurement, survivorship and financial discrimination)
- **Topics of controversy can be debated openly and maturely** (e.g. medicines pricing, inefficiency in cancer care)
- **Growing and emerging matters can be brought forward for stakeholder attention** (e.g. Outcomes Research, Big Data)

The importance of connecting our messages

The obstacles we must overcome together

We must avoid:

- Failing to “speak as one”
- Competing with each other, rather than supporting each other
- Setting the wrong, or under-ambitious, missions for cancer in Europe

Therefore:

- Active forums for dialogue, exchange, understanding and agreement are required
- ECCO can provide part of that solution – with the support of all stakeholders
- Ultimately, it is a platform for connection dependent on the active engagement with it by its membership
