# MSCA Postdoctoral Fellowships 2025

OEI-Academy WEBINAR 1  
February 20, 2025

from 2 pm to 5 pm CET

25. 02. 2025

dr. Stojan Sorčan, NCP MSCA

1

## National Contact Points for Horizon Europe

The network of National Contact Points (NCPs) is the main structure to provide guidance, practical information and assistance on all aspects of participation in Horizon Europe. NCPs are also established in many non-EU and non-associated countries ("third countries").

### NCP Services

In general, the following basic services are available in accordance with the [NCP Guiding Principles](#) agreed by all countries:

1. Guidance on choosing relevant Horizon Europe topics and types of action
2. Advice on administrative procedures and contractual issues
3. Training and assistance on proposal writing
4. Distribution of documentation (forms, guidelines, manuals etc.)
5. Assistance in partner search

# MSCA

Marie Skłodowska-Curie Actions

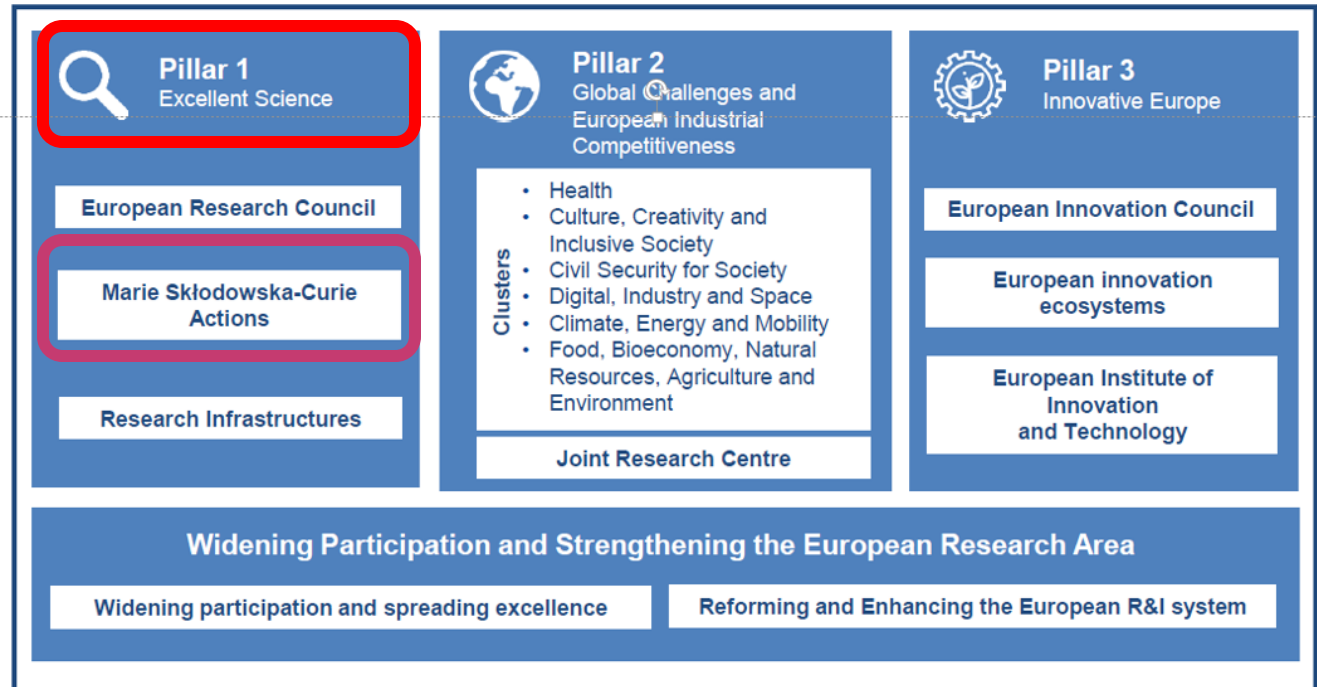

*Developing talents,  
advancing research*

25. 02. 2025

## AGENDA

### MSCA Postdoctoral Fellowships (PF )

1. MSCA as a part of **HORIZON EUROPE**
2. **Main principles** of the MSCA
3. **MSCA PF** key elements
  - Eligibility and budget
4. **Proposal** structure
5. **Award** criteria
  - Excellence, Impact, Implementation
6. Supporting **materials**
7. Looking for **partners** (host, secondment, placement)

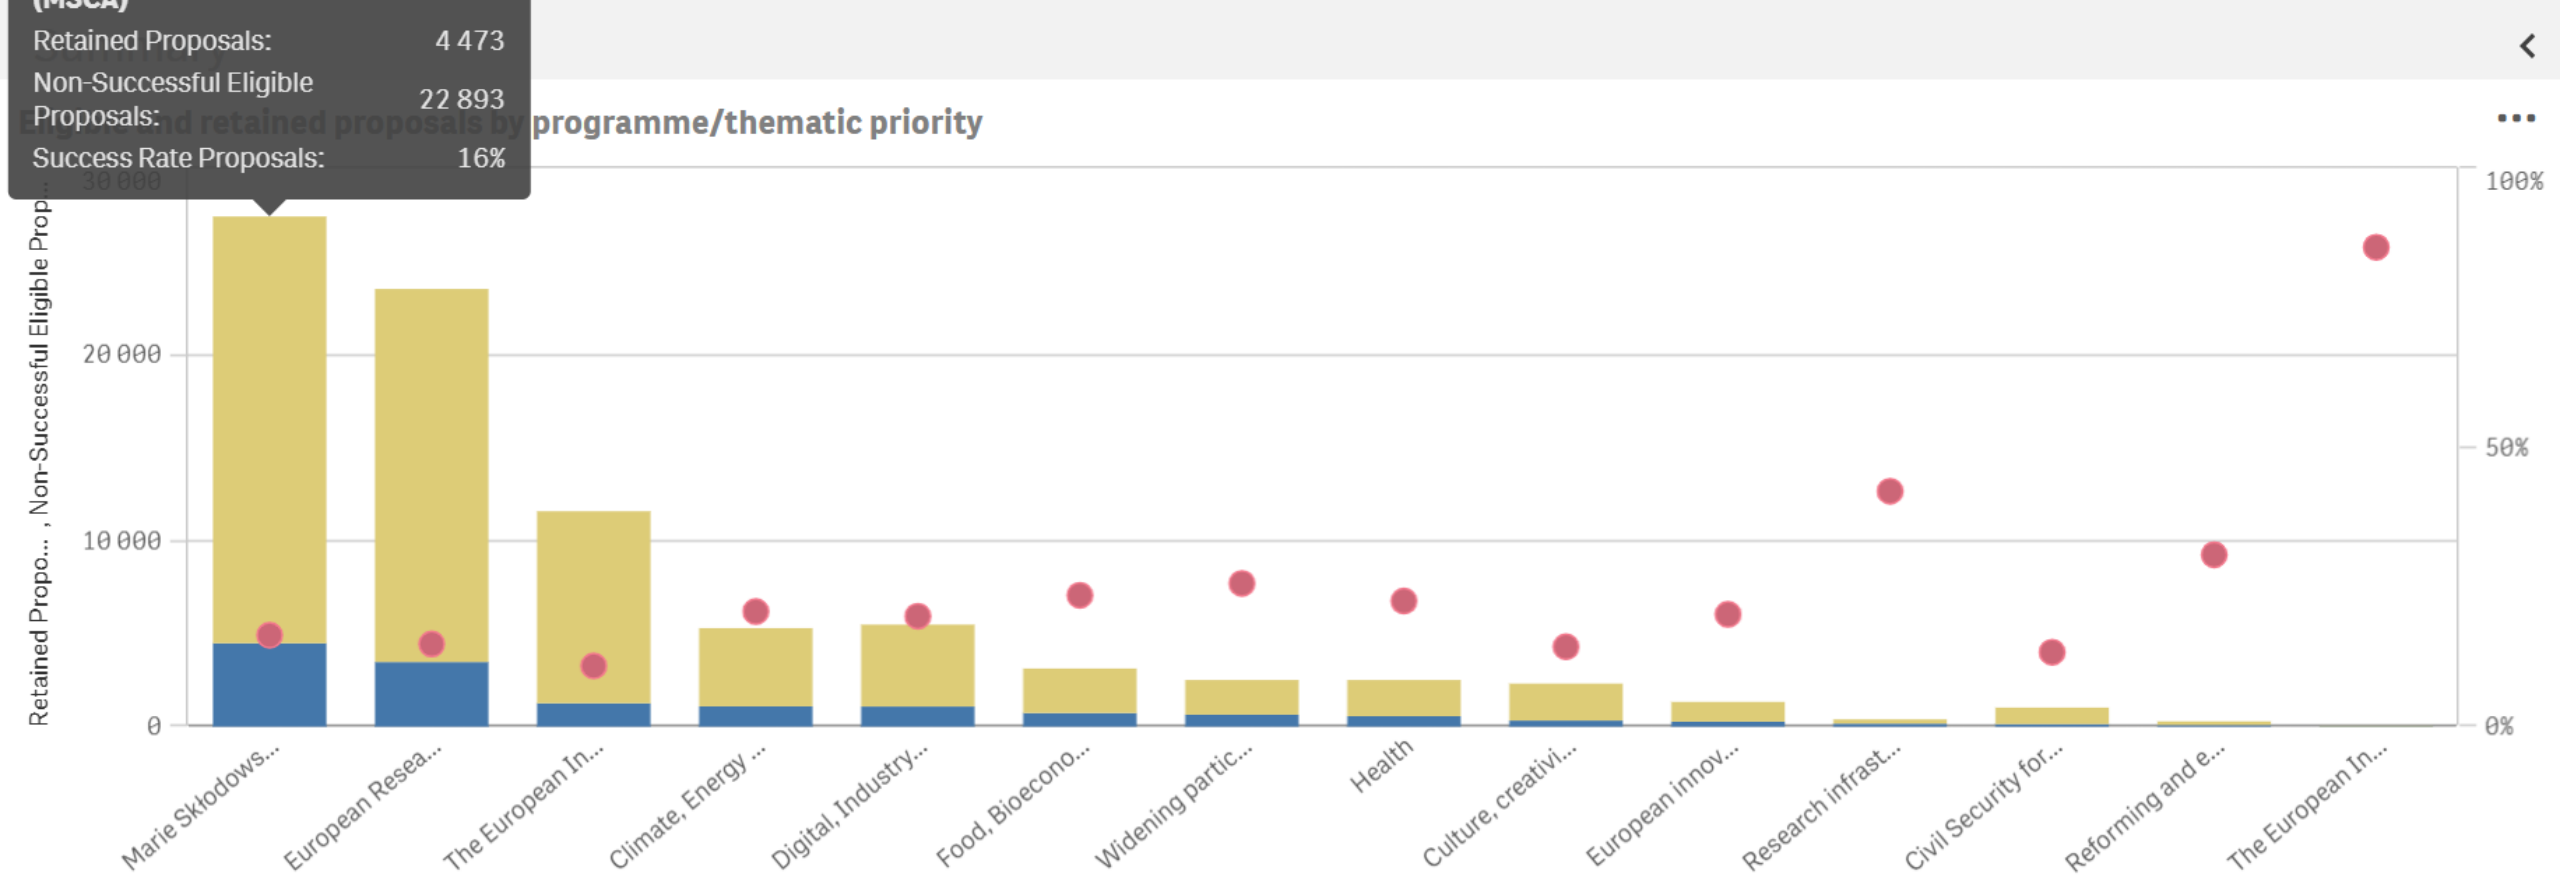

# Eligible and retained proposals by Horizon Europe thematic priority

**Marie Skłodowska-Curie Actions (MSCA)**

Retained Proposals: 4 473

Non-Successful Eligible Proposals: 22 893

Success Rate Proposals: 16%

# The Marie Skłodowska-Curie Actions

Since 1996

Researcher Training and Mobility

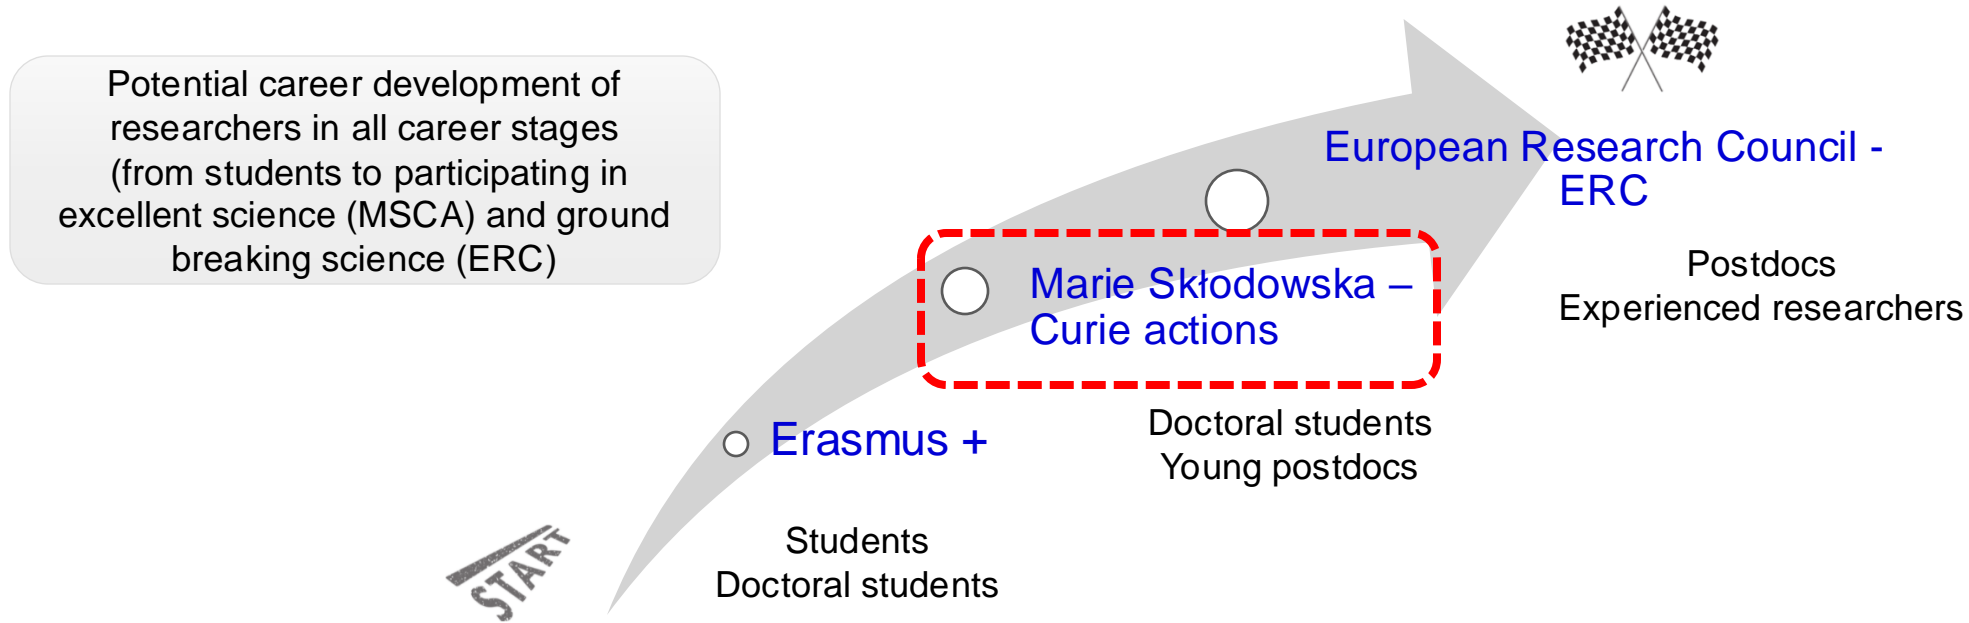

International and Inter-Sectoral

Bottom-Up Approach

150,000 +

## EU's reference programme for **doctoral and postdoctoral training**, contributing to:

- ✓ A highly skilled research-based human capital able to detect and tackle upcoming challenges, communicate scientific evidence to policy-makers and the public, and work across disciplines
- ✓ Develop excellent doctoral programmes enhancing the global attractiveness and visibility of institutions involved in them
- ✓ Provide researchers with skills needed in the labour market, to innovate and to convert knowledge and ideas into products and services for economic and social benefit
- ✓ Promote the EU's global attractiveness for talents

# MSCA: a world reference for research and training

25.02.2025

Impact on

# Rules in a nutshell

## researcher

- Project by an individual researcher
- max. 8 of research experience from date of award of the (first) doctoral degree
- Mobility rule: The researcher cannot have resided or carried out his/her main activity (work, studies, etc.) in the country of the beneficiary for more than 12 months in the last three years prior to the call deadline

+

## host organisation

- located in EU member state or Horizon Europe associated country
- Public or private research organisation, university, research centre, international European interest organisation, international organisation, industry, SMEs (any sector)

## European fellowship

- Project realized at a host institution located in EU MS or AC
- Researcher of any nationality
- Duration: 12-24 months

## Global fellowship:

- Large part of the project realized at a non-European institution
- Researcher needs to be a national or long-term resident of a EU MS or AC
- Duration: 24-36 months
  - ✓ 12-24 months out of Europe
  - ✓ + 12 months mandatory reintegration phase in a EU MS or AC

# Compile your fellowship: facultative elements

	<b>Secondment</b>	<b>Non-Academic Placement</b>
<b>Maximum Duration</b>	<p><u>European Postdoctoral Fellowships</u>: Up to 1/3 of the normal project duration.</p> <p><u>Global Postdoctoral Fellowships</u>: Optional secondments are permitted for up to 1/3 of the outgoing phase.</p>	Up to 6 months duration.
<b>Timing</b>	<p><u>European Postdoctoral Fellowships</u>: At any time during the standard project duration.</p> <p><u>Global Postdoctoral Fellowships</u>: Optional secondments cannot take place during the mandatory 12 month return period to the host organisation in a MS or AC. They may take place at the start of the outgoing phase (up to three months, to be included within the 1/3 maximum duration).</p> <p>Note that all optional secondments can be divided into several shorter periods.</p>	Additional period after the standard duration of the fellowship.
<b>Mobility</b>	Any country worldwide	MS or AC
<b>Sector</b>	Any sector	Non-academic sector only

# Budget

In form of predefined unit costs:

MSCA Postdoctoral Fellowships	Contributions for the recruited researcher per person-month					Institutional unit contributions per person-month	
	Living allowance	Mobility allowance	Family allowance (if applicable)	Long-term leave allowance (if applicable)	Special needs allowance (if applicable)	Research, training and networking contribution	Management and indirect contribution
	EUR 5990	EUR 710	EUR 660	EUR 6700 x % covered by the beneficiary	requested unit <sup>134</sup> x (1/number of months)	EUR 1000	EUR 650

\* A country correction coefficient applies to the living allowance in order to ensure equal treatment and purchasing power parity for all researchers.

# ERA Fellowships 2022 call

**One single evaluation performed under MSCA-PF call:**  
Only one submission & one simple agreement (tick box),  
applicants **significantly increase their opportunities  
to be funded.**

*Proposals are **eligible** for ERA fellowships funding if:*

- submitted by a host institution from a '**Widening**' country
- admissible and eligible for MSCA-PF **European Fellowships** (EF)\*
- have **agreed** to be considered for ERA Fellowships call
- passed **all the thresholds** under the MSCA-PF-EF call
- **failed to reach main list** under MSCA-PF-EF call

*\* MSCA-PF Global Fellowships (GF) proposals are not eligible.*

≥ 85 %

## What is the Seal of Excellence?

The Seal of Excellence is a quality label awarded to project proposals submitted to Horizon 2020, the EU's research and innovation funding programme, to help these proposals find alternative funding.

Projects which were judged to deserve funding but did not get it due to budget limits receive the Seal of Excellence.

It recognises the value of the proposal and helps other funding bodies take advantage of the Horizon 2020 evaluation process.

It is awarded to proposals which applied under

- [SME Instrument](#)
- [Marie Skłodowska-Curie actions \(MSCA\) individual fellowships](#)

**EXCELLENCE**

**POSTDOCTORAL FELLOWSHIPS**

Excellence	Impact	Quality and efficiency of the implementation
<p>Quality and pertinence of the <b>project's research and innovation objectives</b> (and the extent to which they are <b>ambitious</b>, and <b>go beyond the state of the art</b>)</p>	<p>Credibility of the measures to enhance the career perspectives and employability of the researcher and contribution to his/her skills development</p>	<p>Quality and effectiveness of the work plan, assessment of risks and appropriateness of the effort assigned to work packages</p>
<p><b>Soundness of the proposed methodology</b> (including <b>interdisciplinary</b> approaches, consideration of the <b>gender</b> dimension and other diversity aspects if relevant for the research project, and the quality of <b>open science</b> practices)</p>	<p>Suitability and quality of the measures to maximise expected outcomes and impacts, as set out in the dissemination and exploitation plan, including communication activities</p>	<p>Quality and capacity of the host institutions and participating organisations, including hosting arrangements</p>
<p>Quality of the <b>supervision, training</b> and of the <b>two-way transfer of knowledge</b> between the researcher and the host</p>	<p>The magnitude and importance of the project's contribution to the expected scientific, societal and economic impacts</p>	
<p>Quality and appropriateness of the <b>researcher's professional experience, competences and skills</b></p>		
<p><b>50%</b></p>	<p>30%</p>	<p>20%</p>

'In the framework of the MSCA-NET network we have analysed the ESRs and herewith the outcomes are presented.'

**1.1**  
**Quality and**  
**pertinence of the**  
**project's research**  
**and innovation**  
**objectives**

(and the extent to which  
they are ambitious, and  
go beyond the state  
of the art)

- Briefly **describe** the objectives of your proposed work and give an **overview** of the action
- Specific research objectives (ROs) of the project
  - **Number** the objectives O1, O2, O3 etc.
  - Are they **measurable** and **verifiable**?
  - Are they **realistically** achievable?

Tip:  
Use the  
**introduction** to  
capture attention  
of the reader,  
convince that the  
rest is pertinent  
and worth reading

Evaluator: Whether research and innovation objectives are realistically achievable, measurable and verifiable?

# OBJECTIVES

Specific	Measurable	Attainable	Relevant	Time-Bound
Make sure your goals are focused and identify a tangible outcome. Without the specifics, your goal runs the risk of being too vague to achieve. Being more specific helps you identify what you want to achieve. You should also identify what resources you are going to leverage to achieve success.	You should have some clear definition of success. This will help you to evaluate achievement and also progress. This component often answers how much or how many and highlights how you'll know you achieved your goal.	Your goal should be challenging, but still reasonable to achieve. Reflecting on this component can reveal any potential barriers that you may need to overcome to realize success. Outline the steps you're planning to take to achieve your goal.	This is about getting real with yourself and ensuring what you're trying to achieve is worthwhile to you. Determining if this is aligned to your values and if it is a priority focus for you. This helps you answer the why.	Every goal needs a target date, something that motivates you to really apply the focus and discipline necessary to achieve it. This answers when. It's important to set a realistic time frame to achieve your goal to ensure you don't get discouraged.

- Use SMART objectives that address the gaps in the state-of-the-art and correspond to the needs of training a new generation of researchers in Europe
- Scientific objectives should correspond to Work Packages (structured under 3.1)

# OBJECTIVES

- **The overarching aim** is highly **relevant and original**.
- The objectives are **clear, detailed, focused, justified and integrated**
- The objectives are in **relation to the state of the art**.
- The theoretical basis is supported by a sufficient number of **bibliographical references**.
- Project objectives are **verifiable, measurable and achievable** (in the proposed **time frame**) with **performance indicators**.
- The objectives are **ambitious**, innovative and original.
- Clearly defined objectives, both in terms of **specific outcomes, learning goals and training objectives**.
- RO's should correspond to the **research work package** (O1 is the objective for WP1)

## 1.2 Soundness of the proposed **methodology**

(incl. interdisciplinary approaches, consideration of the gender dimension and other diversity aspects if relevant for the research project, and the quality of open science)

- Describe **how the research will be carried out**
  - your overall methodology, incl. the concepts, models and assumptions that underpin your work
  - how this will enable you to deliver your project's **objectives**
- Break this section up into short paragraphs/bullet points
  - describe **the steps/methods** you will take to achieve the research objectives proposed (put in brackets the research objective and work package it relates to)
  - highlight the **experiments, techniques and equipment** that will be used (especially in a novel way)
  - if there will be **new** analysis, concept, methods implemented – mention and highlight it (bold)

# METHODOLOGY

- The RM is **clearly explained** and justified to achieve the objectives.
- The RM and the proposed approach are very well summarized and detailed, with **concrete plans** (tasks) on **how to tackle** the proposed problems and identified **methodological challenges**.
- The RM is very well formulated, is **up-to-date** and **innovative**.
- Include **relevant literature**, **teaching** experiences and **open science** practices.
- The RM **explain why** the approach has been chosen.
- It should possess a high level of **cerainty** and clarify interconnected topics to ensure **coherence**.
- For each method/steps described put in brackets the **work pacakge/objective** (as well as duration).

1.3  
**Quality of the supervision, training and of the two-way transfer of knowledge**  
 (researcher / host)

Be very brief with all relevant information – you can provide more information in capacity table (B2.5 section)

Global fellowships: describe also the transfer with the host of the outgoing phase

For non-academic placement: describe how transfer of knowledge will happen there

- Describe the qualifications and experience of the supervisor(s)
  - experience on the research topic and their track record of work, main international collaborations,
  - experience in supervising/training especially at advanced level (PhD, postdoctoral researchers)
  - participation in projects, publications, patents and any other relevant results
  - mention if impressive: years of experience in the field, h-index,
  - **if you are having a co-supervisor shortly explain his/her added values**
- Outline how a two-way transfer of knowledge will occur between the researcher and the host institution(s)
  - explain what new knowledge you will gain during the fellowship at the hosting organisation(s) and how it will be acquired
  - outline your previously acquired knowledge and skills that you will transfer to the host organisation(s)

Scientific skills	Transferable skills
<ul style="list-style-type: none"> <li>✓ Which new techniques and methods?</li> <li>✓ How - through research or through specific courses</li> <li>✓ Training on "research integrity ", "big data/open science ", digital techniques, tools</li> </ul>	<ul style="list-style-type: none"> <li>✓ Teaching, tutoring/mentoring of students (leadership/communication skills)</li> <li>✓ Project/Financial/Organisational Management (project planning, organisation of a conference)</li> <li>✓ Development of follow-up projects (fundraising, proposal writing)</li> <li>✓ Abilities in working in an international environment (communication, building networks)</li> <li>✓ Business thinking (through your own project)</li> <li>✓ Handling IPR, training in patent law, course in gender awareness</li> </ul>

# TRAINING

- Provide **clear and comprehensive information** on how the researcher **will be trained** with elaborated **training activities** (specific and tangible).
- Explain trainings for **transferable skills** needed for advancing **researchers career**.
- Include **diverse types of training**, formal as well as training-through-research activities, regular meeting with supervisors, interdisciplinary knowledge exchange as well as self-taught courses.
- Explain **meaningful** of the training for advancing **researcher career**.

# TWO-WAY TRANSFER OF KNOWLEDGE (researcher – host)

- Concrete and specific methods for transfer should be specified with benefits for both **the researcher and the host.**
- Explain **the level of the knowledge** transferred and if it is required at the host institution
- Explain **how the knowledge is transferred** to the host institution.
- The two-way transfer of knowledge is convincing as the host organization and the researcher possess **complementary skills.**

1.4  
Quality and  
appropriateness of  
the **researcher's**  
professional  
experience,  
competences and  
skills

- Describe your **existing professional experience** in relation to the proposed research project
  - **why you are the best person to do this fellowship**
  - tell your story & try to get the evaluator to relate/understand you
  - choose the key highlights from your CV to show the evaluator your abilities
    - E.g. research achievements, fellowships and awards received, key conferences, publications, experience in project management, experience in supervision, non-academic sector
- How your existing professional experience, talents and the proposed research **will contribute to your development** as independent/mature researcher?

**Your CV**  
(in Part B2)  
- **will be**  
**reviewed to**  
**confirm**  
**information**  
**given in section**  
**1.4**

NETWORK OF THE  
MARIE SKŁODOWSKA-CURIE ACTIONS  
NATIONAL CONTACT POINTS

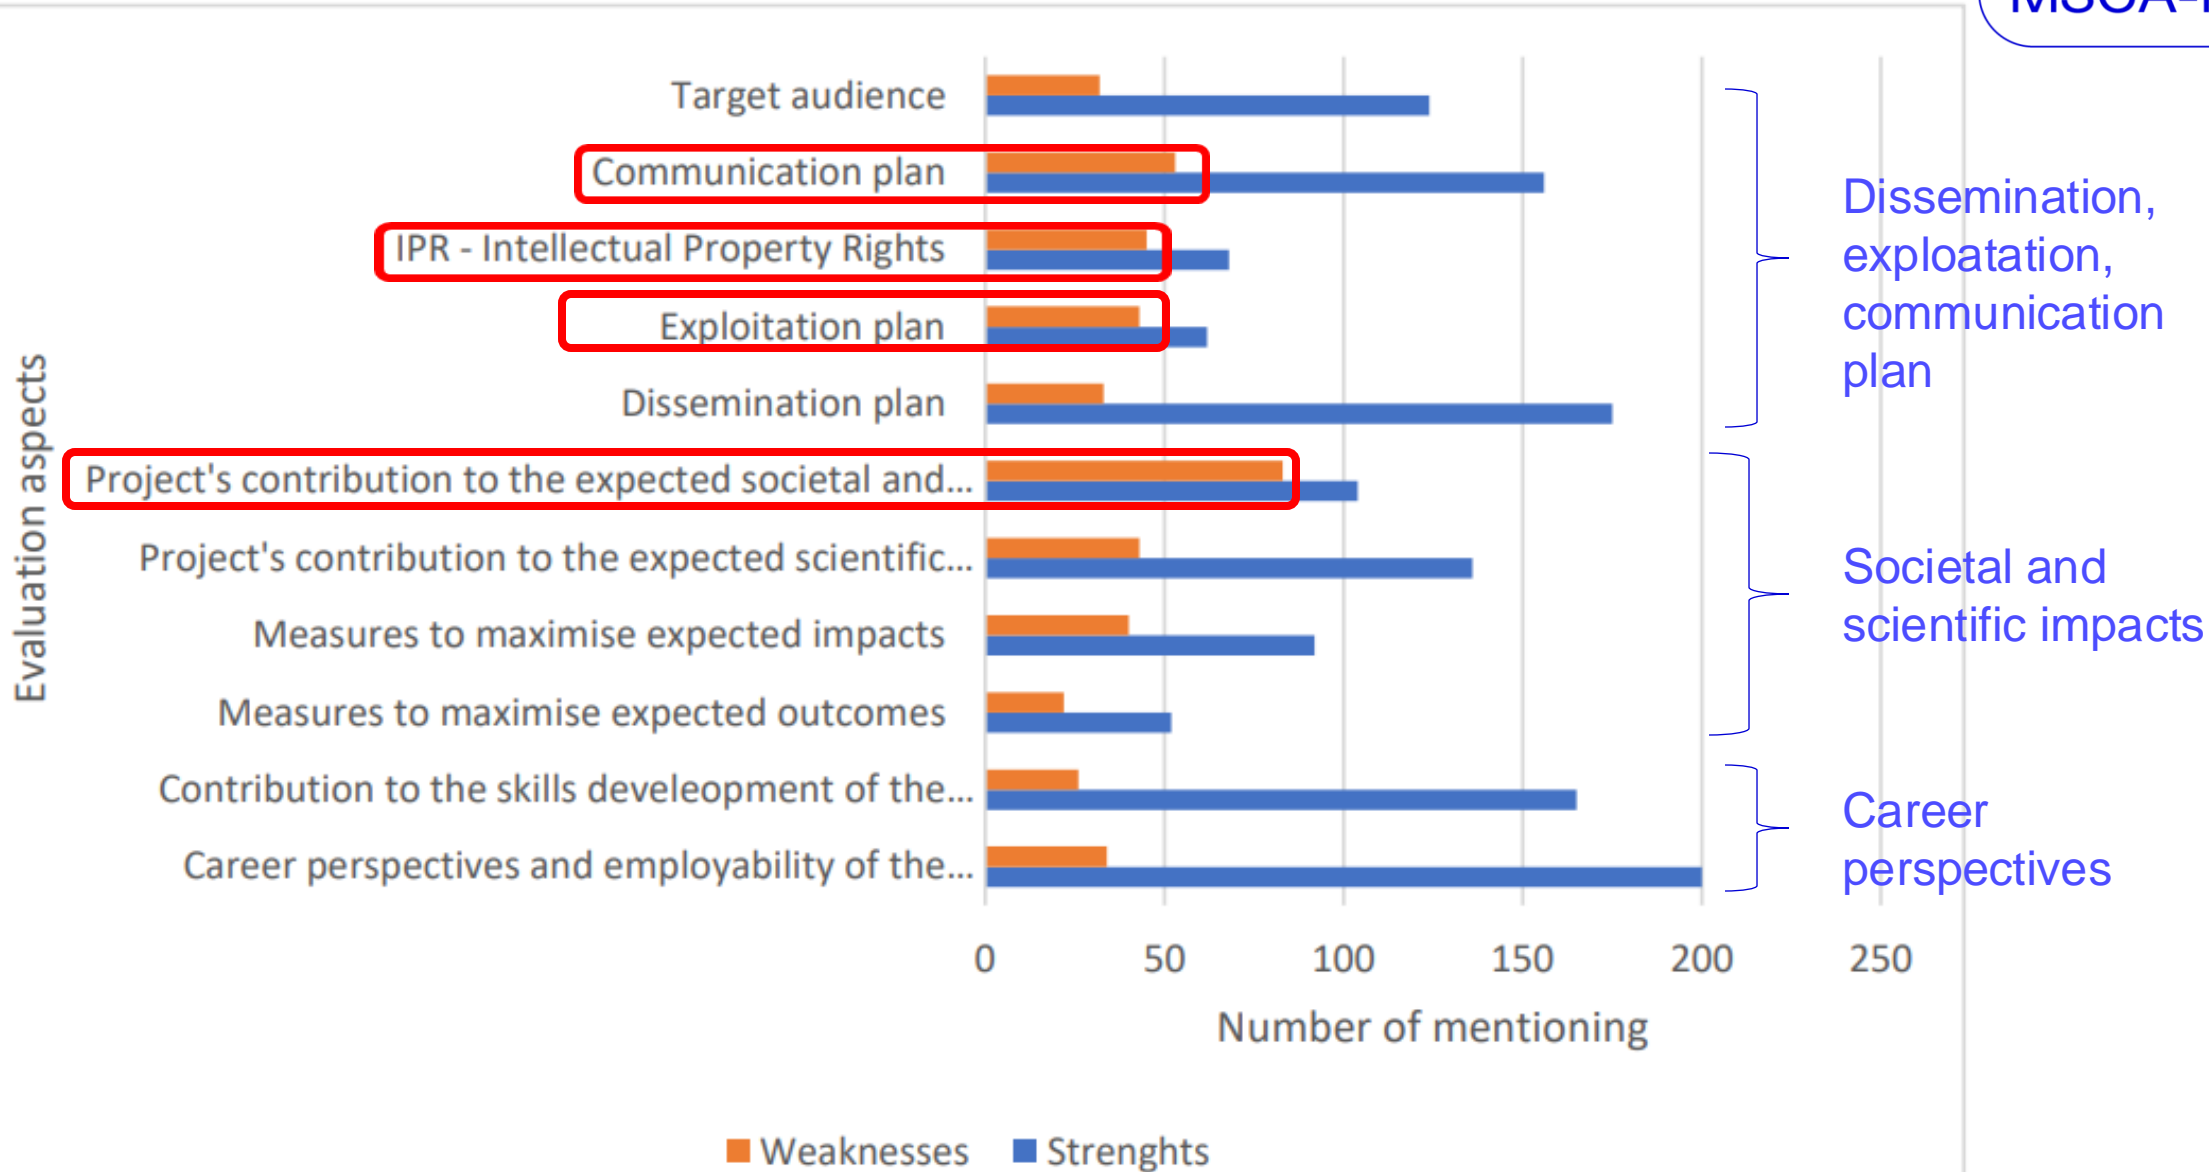

**IMPACT**

**POSTDOCTORAL FELLOWSHIPS**

Excellence	Impact	Quality and efficiency of the implementation
Quality and pertinence of the project’s research and innovation objectives (and the extent to which they are ambitious, and go beyond the state of the art)	<b>Credibility of the measures to <u>enhance the career perspectives and employability</u> of the researcher and contribution to his/her skills development</b>	Quality and effectiveness of the work plan, assessment of risks and appropriateness of the effort assigned to work packages
Soundness of the proposed methodology (including interdisciplinary approaches, consideration of the gender dimension and other diversity aspects if relevant for the research project, and the quality of open science practices)	<b>Suitability and quality of the measures to maximise <u>expected outcomes and impacts</u>, as set out in the <u>dissemination and exploitation</u> plan, including <u>communication</u> activities</b>	Quality and capacity of the host institutions and participating organisations, including hosting arrangements
Quality of the supervision, training and of the two-way transfer of knowledge between the researcher and the host	<b>The magnitude and importance of the project’s contribution to the <u>expected scientific, societal and economic impacts</u></b>	
Quality and appropriateness of the researcher’s professional experience, competences and skills		
50%	<b>30%</b>	20%

'In the framework of the MSCA-NET network we have analysed the ESRs and herewith the outcomes are presented.'

**2.1 Credibility of the measures to enhance the career perspectives and employability of the researcher and contribution to his/her skills development**

Expected skill development of the researcher.  
Expected impact of the proposed research and training activities on the researcher's career perspectives inside and/or outside academia.

- **How** will this project **improve** your **career**?
- **What** are your **career goals**?
  - E.g. tenure-track position, initiating a new laboratory, becoming a pioneer researcher, a new position in the industry, ERC or other grant application...
  - Give specific examples of your career opportunities in the academic & non-academic sectors after the fellowship.
- Focus on **how** the **new competences** and **skills** can make you **more successful**
  - in achieving those career goals
  - in long-term inside/outside of academia
- Describe & highlight the **impact of the collaborations** made during the fellowship
  - especially those intersectoral and interdisciplinary
  - ...you will have a higher impact R&I output on your future work, thus more knowledge and ideas converted into products and services

# EXPLOITATION

WP Expected impact: „Enhance the quality of R&I contributing to Europe's competitiveness and growth;

- Describe the potential **exploitation methods** of your project results that will be used and the impact of the method on the target user/society/industry
- The strategy for **targeting end-user associations and other stakeholders** is appropriate.
- **Intellectual property rights** and **commercialization** aspects will be thoroughly considered for protection by **patent** before publication.
- The possibility of registering **patents** is considered
- The potential **business exploitation** is foreseen and clearly described.
- ...interaction with the **Technology transfer office**
- ... describes well the potential **commercialisation** and patent application.
- Some of the results will be disseminated through an **open source** computation.

# COMMUNICATION

- Demonstrate how both the research and results will be made known **to the public** in a such way they can be **understood by non-specialist**.
- Demonstrated how the planned **public engagement activities** contribute to **creating awarness** of the performed research.
- The communication strategy would adequately be **distributed throughout the duration** of the fellowship thus ensuring a constant interest about the research.
- The **communication strategy** to address different **target audiences** is **detailed** and convincing with **clear goals**.
- It includes appropriate and **varied measures** for public engagement and for creating **awareness** of the research.
- It will use a **wide range of standard communication measures**.
- The use of **social media** networks is appropriate.

2.3 The magnitude and importance of the project's contribution to the **expected scientific, societal and economic impacts**

- **Impact on the wider scientific field, broader societal and economic implications**
  - how will our knowledge be **advanced** by this project
  - how can it be **relevant** to the diverse stakeholder communities, policy-making, industry etc.
- **Expected scientific impact(s)**: e.g. contributing to specific scientific advances, across and within disciplines, creating new knowledge, reinforcing scientific equipment and instruments, computing systems (i.e. research infrastructures)
- **Expected economic/technological impact(s)**: e.g. bringing new products, services, business processes to the market, increasing efficiency, decreasing costs, increasing profits, contributing to standards' setting, etc.
- **Expected societal impact(s)**: e.g. decreasing CO2 emissions, decreasing avoidable mortality, improving policies and decision-making, raising consumer awareness

NETWORK OF THE  
MARIE SKŁODOWSKA-CURIE ACTIONS

**IMPLEMENTATION**

**POSTDOCTORAL FELLOWSHIPS**

Excellence	Impact	<b>Quality and efficiency of the implementation</b>
Quality and pertinence of the project's research and innovation objectives (and the extent to which they are ambitious, and go beyond the state of the art)	Credibility of the measures to enhance the career perspectives and employability of the researcher and contribution to his/her skills development	Quality and effectiveness of the <b><u>work plan</u></b> , assessment of <b><u>risks</u></b> and appropriateness of the <b><u>effort</u></b> assigned to work packages
Soundness of the proposed methodology (including interdisciplinary approaches, consideration of the gender dimension and other diversity aspects if relevant for the research project, and the quality of open science practices)	Suitability and quality of the measures to maximise expected outcomes and impacts, as set out in the dissemination and exploitation plan, including communication activities	Quality and capacity of the <b><u>host institutions</u></b> and participating organisations, including <b><u>hosting</u></b> arrangements
Quality of the supervision, training and of the two-way transfer of knowledge between the researcher and the host	The magnitude and importance of the project's contribution to the expected scientific, societal and economic impacts	
Quality and appropriateness of the researcher's professional experience, competences and skills		
50%	30%	20%

'In the framework of the MSCA-NET network we have analysed the ESRs and herewith the outcomes are presented.'

3.1 Quality and effectiveness of the **work plan**, assessment of risks and appropriateness of the effort assigned to work packages

- Describe how the **work planning** (including deliverables and milestones) and the **resources mobilized** will ensure that the research and training objectives will be reached
- This section has three parts which will be assessed:
  - 3.1.1 Work packages tables
  - 3.1.2 Appropriateness of tasks
  - 3.1.3 Gantt chart

Tip:  
Work packages should be consistent with your plans (Excellence section)

# Work Programme

- A **clear work packages' structure** is provided with a **detailed description of the tasks** and clear assignment of plausible **milestones** and **deliverables**. The **Gantt chart** is well structured, covering all the activities outlined in the proposal.
- The work plan is **adequate** including the Gantt chart and is sufficiently **effective** for the completion of the project.

3.1 Quality and effectiveness of the work plan, **assessment of risks** and appropriateness of the effort assigned to work packages

- The overview should clearly justify why the number of person-months planned and requested for the researcher (and corresponding to the project duration) is appropriate in relation to the proposed activities
- Show that you are aware of risks and outline your specific mitigation plans and measures to handle or minimize risks

Tip:  
Ask your host institute for support and cooperate with their project office.

# The risk assessment

- **The scientific risks** regarding the modest results in terms of XY are very well highlighted, and it provides **clear research strategies** aimed at increasing the likelihood of success.
- Risks are well explained (for instance regarding delays in the fieldwork) and there are **good mitigation and contingency measures**.
- Research and **administrative** risks are well identified, and appropriate mitigation measures are proposed.

3.2 Quality and capacity of the **host institutions** and participating organisations, including hosting arrangements

- The main tasks and commitments of the beneficiary and the partner organisation in the framework of the project
  - For the GF also the role of partner organisations in third countries
- Infrastructure, logistics, facilities provided for the implementation of your project at the host institution ...
  - if the latter has signed the European Charter for Researchers and Code of Conduct for the Recruitment of Researchers, mention this
- Explain how will you be integrated in the hosting organisation, lab, research team
  - be specific, show clear plans

# Hosting arrangement

- The hosting arrangements and related **services** available to **support** the **integration** of the researcher are good.
- The hosting arrangements, providing administrative and scientific support, are **described in great detail** and are **completely suitable** for the full **researcher's integration**.
- Hosting arrangements and integration measures at **the return host institution** are adequate and very well detailed.
- The **plan for initial integration** of the researcher in the host institution is good and there are good means for **everyday integration** through meetings, seminars and networking. Also, the proposal identifies clearly the **support and guidance** that will be made available for the researcher.

## Unraveling the Photochemistry of Radiosensitizers and Radioprotectors in Free Biomolecular Complexes

[Fact Sheet](#)[Reporting](#)[Results](#)

### Objective

Dramatically increasing cancer cases around the world call for extra research efforts to improve cancer therapies. Radiation therapy or radiotherapy is one of the most common treatment methods. A way to enhance radiotherapy is inserting 'radiosensitizers (RSs)' and 'radioprotectors (RPs)' into the patient's body. RSs in tumor cells make them more sensitive to radiation damage, allowing one to use reduced radiation doses, thus minimizing side effects. In contrast, RPs inhibit the damage of healthy cells from radiation. RSs and RPs are actively studied mostly in clinical trials. However, the fundamental mechanisms causing damage or death of cancer cells are not fully understood. Therefore, this project aims at elucidating the elementary steps of radiation damage, their enhancement by RSs, and their inhibition by RPs. The technique combines beams of mixed molecular clusters and doped helium nanodroplets uniquely with synchrotron spectroscopy, electron spectroscopy, and ion mass spectrometry. The main goals are to unravel the photochemistry of selected organic RS compounds (nimorazole, NIMO, bromoadenine, WR-1065 dihydrochloride), metal ions (Mg<sup>2+</sup>, Ca<sup>2+</sup>, K<sup>+</sup>), and gold (RS) and silver (RP) nanoparticles in the state of controlled microhydration and contact with DNA components (thymine, cytosine, tetrahydrofuran). Emission of slow electrons, water fragmentation, and anions formation are observables for radiation damage enhanced by RSs. A time-resolved experiment on the tetrahydrofuran-water complex will elucidate the ultrafast dynamics of intermolecular energy transfer causing dissociation, a mechanism recently identified to play an important role in radiation damage. A better understanding of the radiochemistry of RPs and RSs obtained with this project may help develop new schemes for efficient cancer treatment and identify new types of molecules or nanoparticles with improved RS or RP properties.

[Unraveling the Photochemistry of Radiosensitizers and Radioprotectors in Free Biomolecular Complexes | Project | Fact sheet | HORIZON | CORDIS | European Commission](#)

- Start writing **early enough** - you will rewrite your proposal over and over
  - several months before the deadline
- Ensure cooperation with the **supervisor/host institution**
  - you will need a lot of information
- Make a **checklist** with all evaluation criteria
  - respond all of them dilligently
- Use the call-specific Standard application form - available in the Submission System
- Let others (non-experts as well) **read your proposal**
  - they must at least get a clue what your proposal is all about
  - test your proposal with different audiences – colleagues, collaborators, your future supervisor and perhaps some of his colleagues, project office at your host institute
- See if you can get a **proofreading help** from MSCA NCP

## Where to seek advice? National Contact Points (NCPs)

- NCPs as national support structures for Horizon Europe applicants give **personalised support** on the spot and **in applicants' own languages**, in accordance with the NCP Guiding Principles agreed by all countries:
  1. Guidance on **choosing relevant** Horizon Europe topics and **types of action**
  2. Advice on **administrative procedures** and contractual issues
  3. Training and assistance **on proposal writing**
  4. Distribution of documentation (**forms, guidelines, manuals** etc.)
  5. Assistance in **partner search**
- Note: As the NCPs work in national structures, the type and level of services offered may differ from country to country.

**We need
