

OECIWorld Network

September 10-12 – 2024

Villa Verganti-Veronesi
Viale Lombardia, 33,
20001 Inveruno (Milan)
Italy

Introduction

OECI announces the establishment of OECIWORLD, a network of OECI Associate Members Type B*.

The expansion of OECI membership in other continents (Asia, Africa, Latin-America), and other countries such as Ukraine, Moldova and Turkey, has spurred us to launch an initiative that can enable the OECI Associate Members Type B to easily participate in OECI activities, define joint programmes and access international funding sources involving OECI.

The establishment of the Network is included in the Strategic Programme of the OECI Presidency 2023-2026.

Focal points of the OECIWORLD Programme

- Promote the concept of quality in their institutions
- Access, where possible, the OECI Accreditation and Designation Programme
- Define new certification models adapted to local contexts
- Create new bilateral collaborations between European and extra-European institutes
- Develop projects on international financing funds
- Collaborate in the establishment of new oncology networks that bring together specific countries on a continent tailored on the OECI model
- Support the adoption of national cancer plans
- Support the concept of patient as a recipient of the best treatment opportunities notwithstanding his/her residency
- Bring OECI and institutes from other continents closer to the WHO and IARC programmes.

* The Associated Members Type B are those cancer centres/institutes that do not fulfil the conditions provided for in Article 4 of EEC Regulation n° 2137/85 of 25 July, 1985 on the creation of a European Economic Interest Grouping. Are therefore excluded Members in the European Economic Area (EEA) + UK and Switzerland.
